Social Affairs

Talk outline

- Global trends in national institutional arrangements for SDG implementation
- Global trends in monitoring, follow-up and review of the SDGs at the national level
- Examples of multi-stakeholder platforms around SDG implementation

Global trends in national institutional arrangements for SDG implementation

- Broadening and deepening institutionalization of the 2030 Agenda in both developing and developed countries
- Most countries have effected changes in the following areas:
 - Adaptation of legal and regulatory frameworks for SDG implementation
 - Alignment of national strategies and plans with the SDGs
 - Creation of SDG implementation roadmaps or action plans
 - Creation of piloting/coordination structures in government for the SDGs
 - Development of national SDG monitoring, follow-up and review frameworks
- No regularities or “typical” patterns of institutionalization of the Goals are easily identifiable across countries
- Changes in the national political context can impact the national institutional frameworks for SDG implementation

Achievement of 9 institutional milestones by 2020

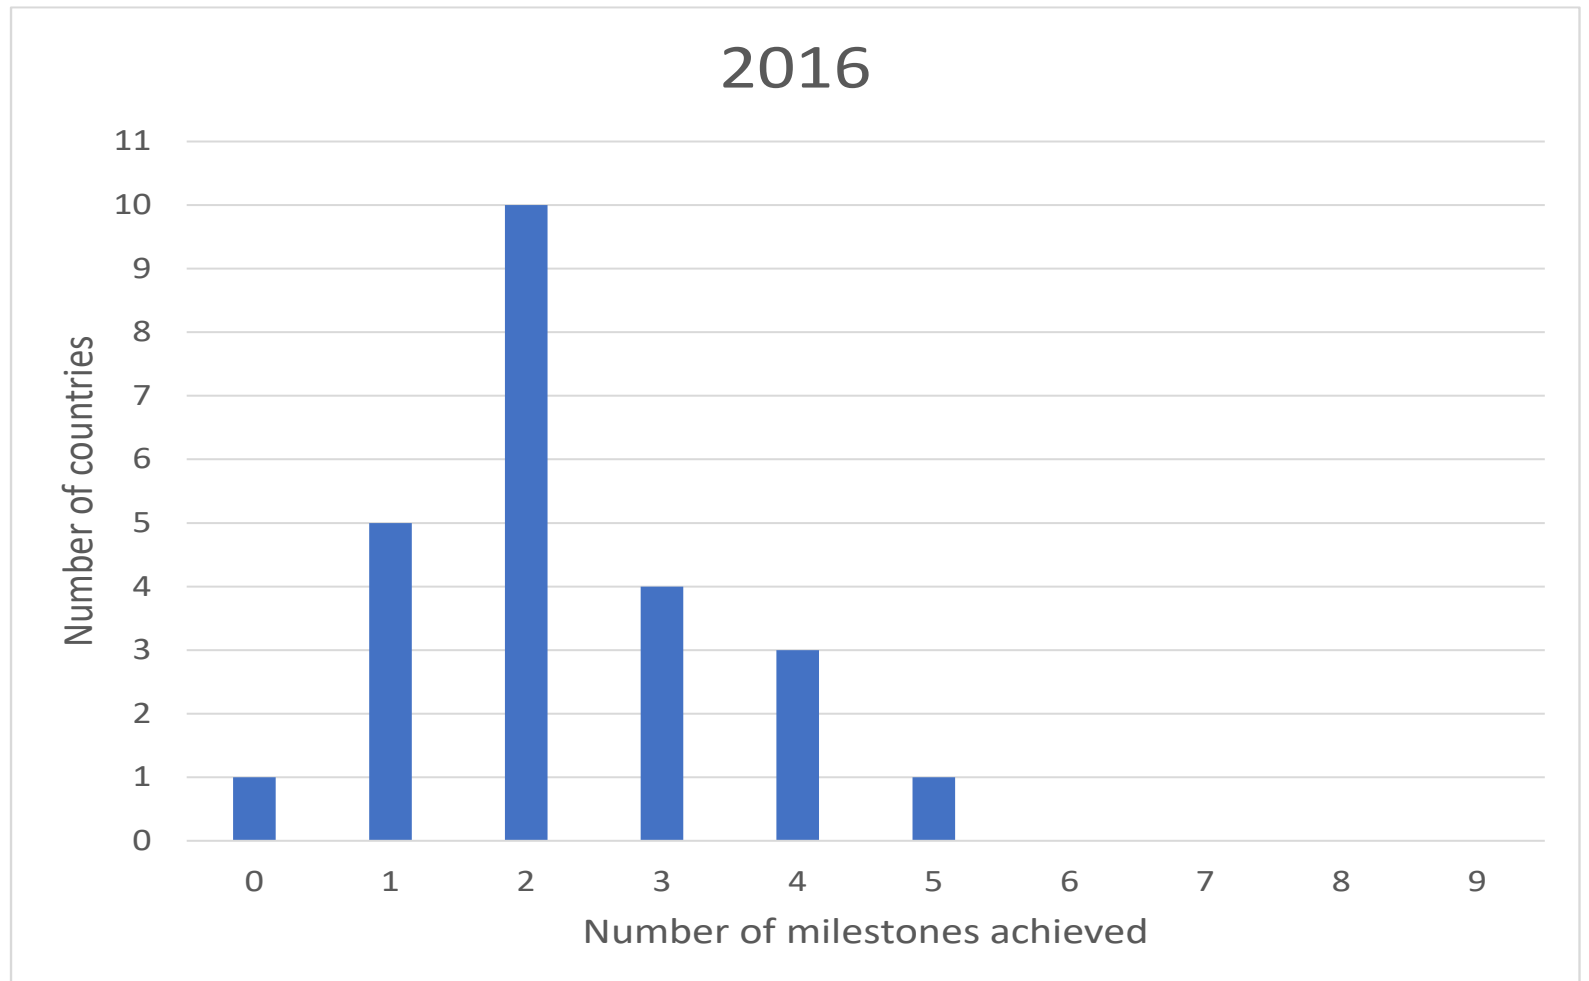

Research sample of 24 diverse countries

Number of countries having achieved each milestone by 2020

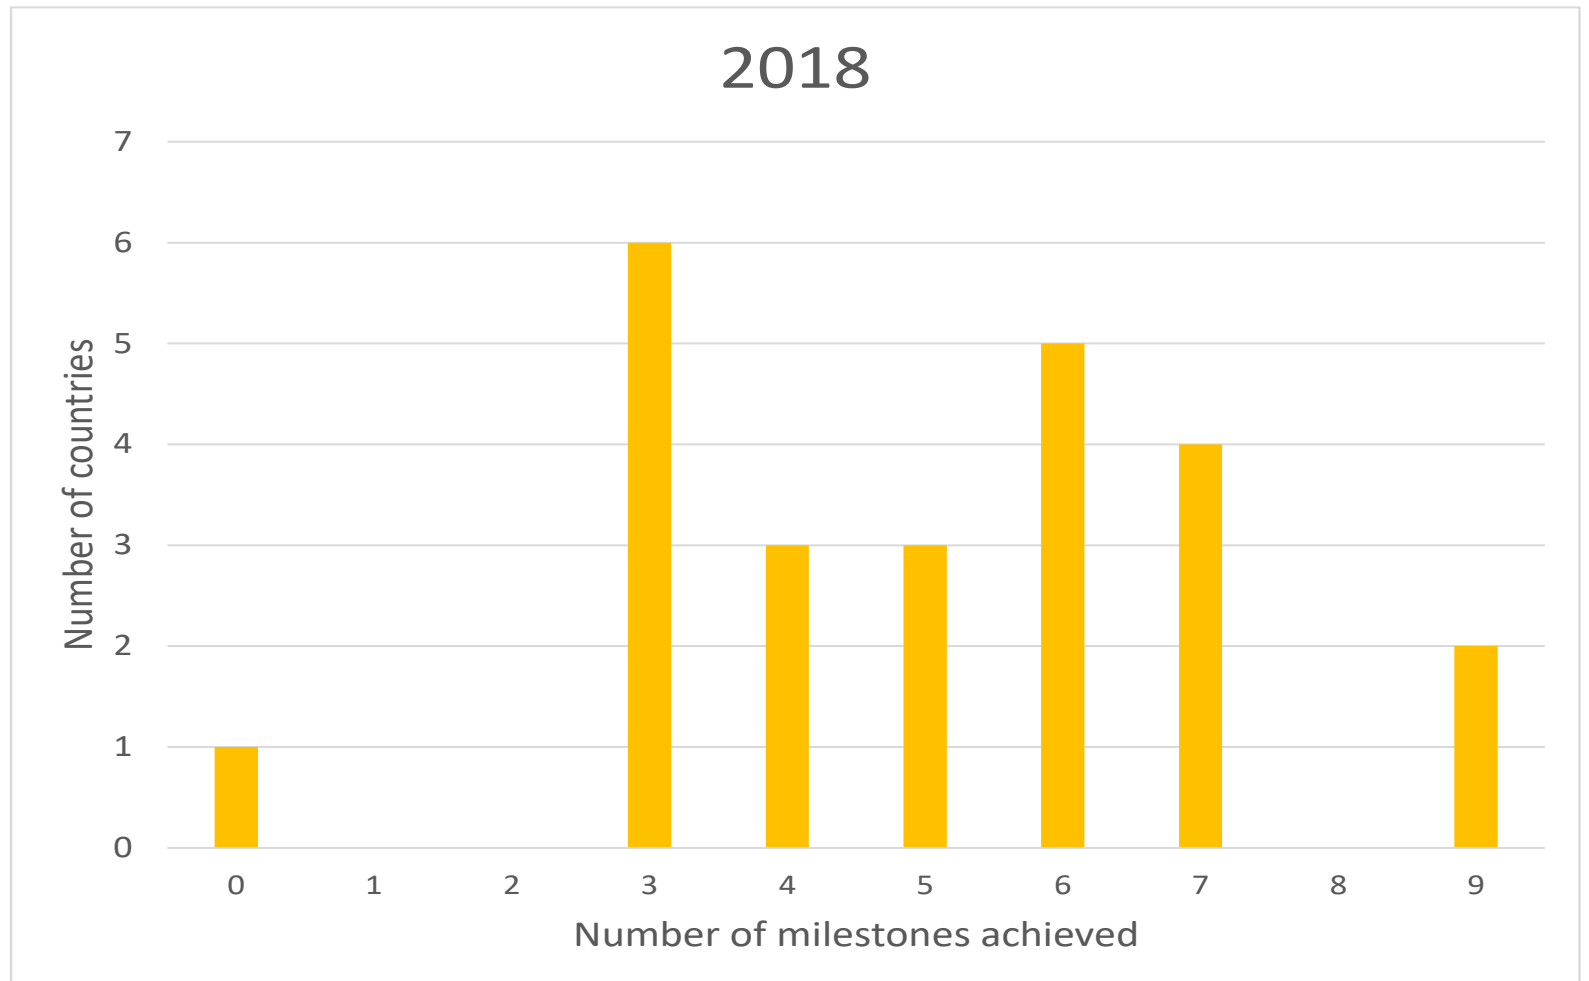

Distribution of number of milestones achieved

Monitoring, follow-up and review at the national level: global trends

- Increased institutionalization, closely related to SDG integration in national processes
- Diverse institutional settings for SDG monitoring and follow-up systems
- Progress on indicators and data
 - Most countries producing data for global SDG indicators and/or have developed national SDG indicators
 - Data limitations
 - National strategies for the development of statistics not always aligned or revised based on SDGs
 - Disruptions in data collection systems from COVID-19
- Traction from voluntary national reviews at the global level
- Increasing national reporting on SDG progress
 - Varied frequency, focus and process
- Independent evaluations of national SDG implementation are very rare (exception: Finland)

Division for Public Institutions and Digital Government (DPIDG)

Monitoring, follow-up and review at the national level: global trends (continued)

Sub-national level

- In general, institutionalization less advanced than at national level
- Strong focus on indicators, with different approaches
- Reporting focused on the local context – e.g. recent rise of voluntary local reviews

Involvement of national oversight institutions

- Uneven role of parliaments in SDG implementation oversight across countries
- Different institutional settings for SDG oversight in parliament
- Few examples of regular reporting of progress from government to parliament
- In most countries, supreme audit institutions (SAIs) not formally part of the SDG follow-up and review system
- But SAIs have increasingly provided relevant inputs (audits of government preparedness to implement the SDGs, SDG implementation audits)

Monitoring, follow-up and review at the national level: critical dimensions

Integration with existing M&E systems

- Integration challenges with national and sectoral M&E systems and across levels of government
- Negative impacts on measurement, reporting

Integration with performance systems

- Links between SDGs and existing performance systems (e.g. budget) are rare

Feedback loops

- Evidence and data often do not inform policy-making
- Some exceptions: Finland's independent evaluation; uptake of recommendations from SDG audits in some countries

Engagement of stakeholders in SDG implementation: global trends

- Entry points for various actors into SDG-related institutional processes are multiplying
- Yet, wide variations across countries in the levels of involvement of different state and non-state actors
- Many areas for potential interaction, different roles depending on stakeholders, varying degrees of institutionalization
- Potential for cross-country learning in every area of SDG implementation, including monitoring, evaluation, and capacity building

Entry points for non-State stakeholders: examples

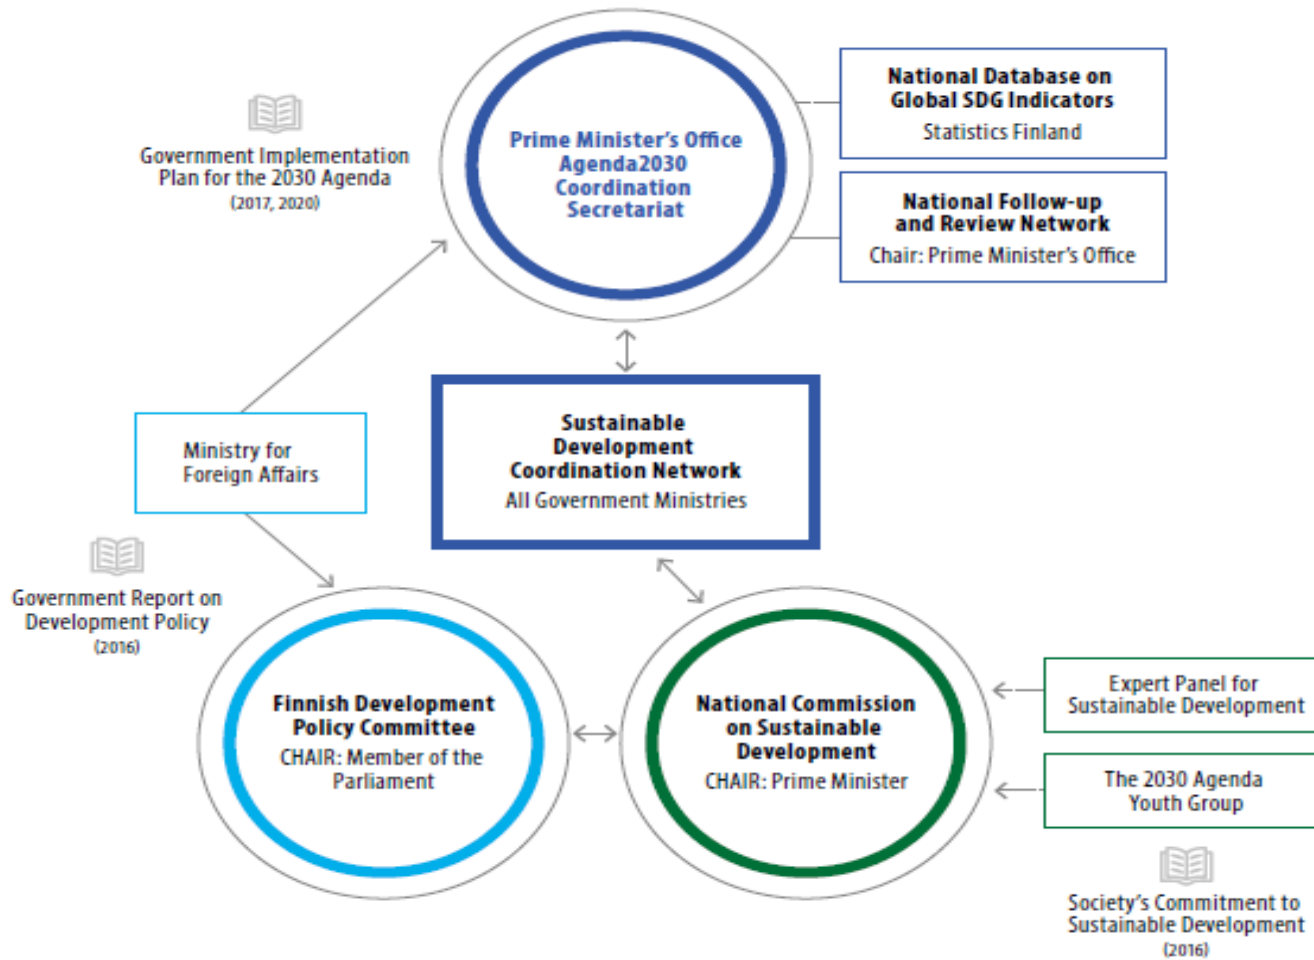

- Involvement in national institutional coordination mechanisms
- Participation in national consultative bodies (e.g., National Commissions on Sustainable Development)
- Nationalizing the Goals (through the adaptation of the SDGs, targets and indicators to the national and local contexts)
- Monitoring and reporting on SDG progress (participation in national SDG progress reports / voluntary national reviews; independent reviews of progress on the SDGs; voluntary local reviews)
- Science-policy interface
- Awareness-raising related to the SDGs
- Capacity building for public servants, civil society

Variety of actors: Composition of the Estonian Commission for Sustainable Development

- Estonian Trade Union Confederation
- Estonian Chamber of Commerce and Industry
- Estonian Association for Environmental Management
- Estonian Council of Environmental NGOs
- Association of Estonian Cities
- Estonian Society for Nature Conservation
- Association of Rural Municipalities of Estonia
- Estonian Forest Society
- Estonian Heritage Society
- Estonian National Youth Council
- Estonian Chamber of Agriculture and Commerce
- Estonian Academy of Sciences
- Estonian Union for Health Promotion

- Estonian Union of Child Welfare
- Estonian Education Forum
- Estonian Chamber of Culture
- Universities Estonia
- Estonian Cooperation Assembly

Involved in the work of the Commission since 2016:

Estonian Roundtable for Development Cooperation

Estonian Association for the Club of Rome

Estonian Renewable Energy Association

The Responsible Business Forum of Estonia

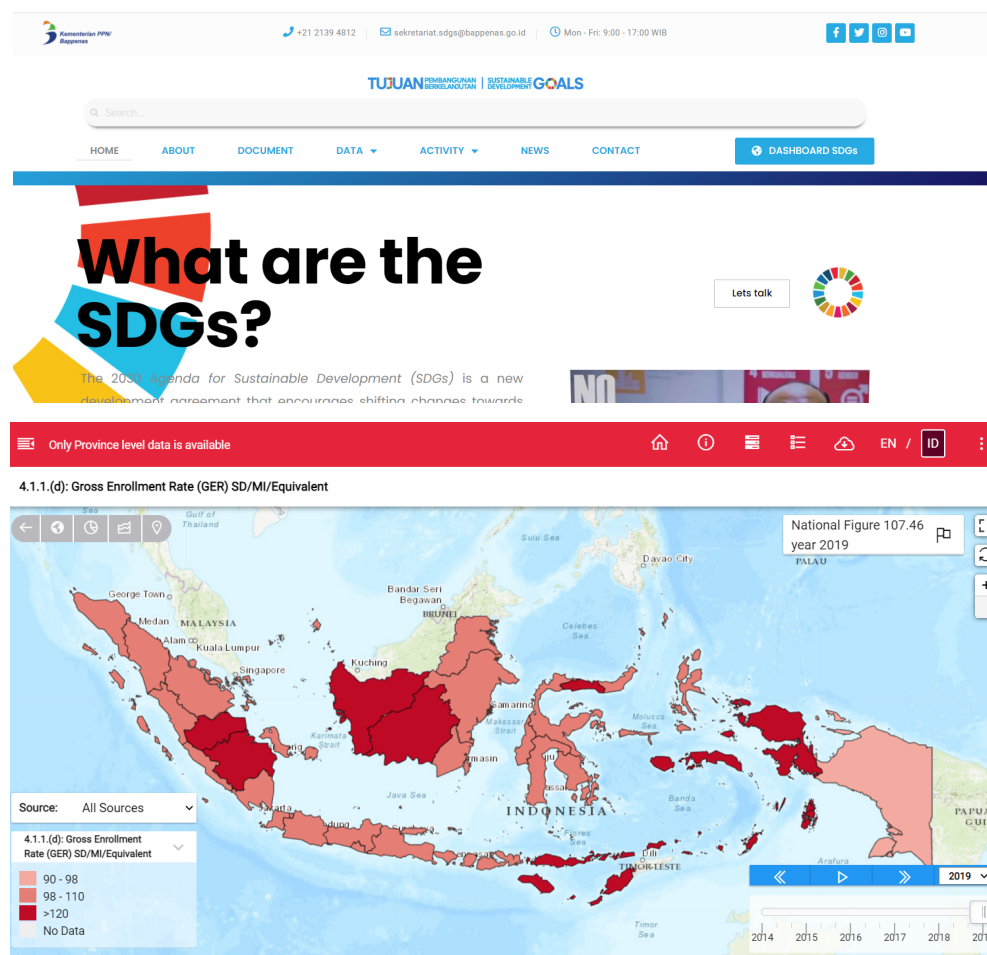

Civil society SDG platform: Kenya

- SDGs Kenya Forum for Sustainable Development, a group of more than 350 civil society organizations
- Collects and disseminates information on SDGs <https://sdgkenyaforum.org/>
- Produces reports on SDG implementation in Kenya
- Now co-chairs, along with the government and a private sector umbrella group, the Inter Agency Technical Working Committee (IATWC), which supports the SDG Coordination Directorate within the National Treasury and Planning Ministry

Central SDG platform: Indonesia

- <http://sdgs.bappenas.go.id/>
- Maintained by Ministry of Planning (Bappenas)
- Centralizes all the legal, regulatory and planning-related information on SDGs, guidelines, other resources
- Link to Indonesia's SDG Dashboard
<http://sdgs.bappenas.go.id/dashboard/>
